

PLASTIC BOWL COVERS

Plastic Bowl Covers for Eye/Facewash Stations & Combination Showers

Encon Safety Products expands your eyewash product choices by adding a Plastic Bowl Cover to its Yello-Bowl® and Stainless Steel (SS) Bowl eyewash, eye/facewash and combination shower stations — all models with brass chrome-plated wyes — just add “PBC” to the model number. Designed to help keep your equipment clean, our bowl covers protect the eyewash and eye/facewash heads against airborne contaminants.

- Made of high visibility, corrosion-resistant ABS yellow plastic.
- Push plate actuator and/or foot treadle opens the cover and activates the eyewash in one easy motion.
- Closing of the cover is independent of water flow actuator, allowing the eye/facewash station to be inspected for maintenance or inspection. Simply return push plate to OFF position after use, then manually close the cover at any time.
- Retrofit kits are available for Encon Yello-Bowl® eyewash, eye/facewash and combination Yello-Bowl® shower stations.
- Available on all combination shower and eye or eye/facewash units with BCP wyes.

STAINLESS STEEL BOWL COVERS

Stainless Steel Bowl Covers for Eye/Facewash Stations & Combination Showers

Encon developed its Stainless Steel Bowl with Cover to promote the safe, long life of your eyewash, eye/facewash and combination shower stations, and provide you with more choices in safety equipment for your facility. The Stainless Steel Bowl and Cover protect the eye/facewash heads from airborne contaminants found in various hazardous environments.

- Bowl and cover constructed of 304 stainless steel.
- Push plate and/or foot treadle actuator opens the cover and activates the eyewash in one easy motion.
- Closing of the cover is independent of water flow actuator, allowing the eye/facewash station to be inspected for maintenance or cleaning. Simply return push plate to OFF position after use, then manually close the cover at any time.
