PRODUCT DESCRIPTION

Drain Tray Assembly Kit attaches to Gravity-Fed Eyewash pivot pins. ABS plastic tray collects (without overflow) and directs spent water to a suitable container.

TRAY ASSEMBLY

1. Position hook inside tray with the opened curled end facing toward the shallow end of tray.
2. Insert screw through locator hole in tray. Pass screw through bottom curl of hook and washer. Secure with lock nut.
3. Perform procedures 1 & 2 above for both sides of drain tray assembly.
4. Drain hose can be assembled for horizontal flow or vertical flow from tray.

HORIZONTAL DRAIN FLOW: Cut 6 ft. hose to desired length. Insert barb elbow fitting into one end of the hose which was cut to length. Connect other end of the hose to drain tray stem. Select desired flow direction. Attach other hose to opposite end of the barb fitting and direct to appropriate drain area or receptacle.

Caution: **Drain hose shall not rise above the stem of the drain pan to prevent overflow of pan.**
The pan will not overflow when the hose is level or angled up to grade.

VERTICAL DRAIN FLOW: Attach hose to drain pan stem and direct to grade.

5. Attach drain tray via hooks (curled end facing backward) to hinge pins on gravity fed eyewash station. The drain tray assembly is now ready for use.
